

Longstory

LongStory is an episodic dating and adventure sim about love, romance, relationships and mystery. The LGBTQ+ friendly game lets players choose their appearance and pronouns as well as who, or even if, they would like to date any of the 5 dateable characters. **Honest and authentic, the game has a story for everyone.**

Experience

Welcome to Weasel Heights, a school as weird as it's name. Get to know Colin, Nora, Marcel and Abby and other loveable characters. Solve the mystery of a student's disappearance, cope with bossy HanniferJane and experience group meditation with well-intentioned Principal Chevy.

Features

- Available for IOS / Android
- PC version will be available Summer 2017
- Saeson one: Six episodes available as IAP
- Two additional special episodes available as IAP
- Diverse cast is representative and realistic

Audience

LongStory is rated 12 + (IOS) & Teen (Android) and has been written for players in middle school and above.

Gameplay

LongStory is a choice-based adventure story where the player controls the plot and romantic outcomes through their conversations and decisions within the game.
